Your IT Issues Addressed.

Angel have been working within the Education sectors for many years. During this time we have gained a knowledge and understanding of the IT challenges faced in this market and what solutions work best.

- Integrate multiple vendor technologies to improve ROI.
- Experienced in new build environments and legacy integration.
- Create an intelligent building to reduce operating expenditure, increase safety and security and support new services that enhance campus life.
- Eliminate physical barriers and improve space utilisation with wireless networks.
- Improve campus communication and enhance the educational experience using digital media solutions.
- Protect academic records, information, and property with a secure network infrastructure and IP based access control and surveillance.
- Reduce carbon footprint and operating costs with Energywise and Virtualisation.
- Run projects with minimal risk and disruption to teaching.

Technologies.

Angel are experienced in deploying technologies that are relevant to you

ICT solutions from Angel allow you to improve communications, streamline operations, reduce costs and ultimately connect students and staff.

Routing and switching

Boost the resiliency, performance and efficiency of your data centre so that it can cope with the ever increasing demands of computer users and data intensive applications such as delivering digital content.

..Keeping IT Simple - A high performance network with virtual servers and storage providing immediate disaster recovery for 100% availability and a reduced carbon footprint.

Security & IPCTV

Safety and security solutions must protect both your campus network and physical environment. Security solutions from Angel can mitigate risks to student records, allow better control access to the network and improve physical campus safety and security.

..Keeping IT Simple - Staff, student and visitor network access now integrated with building access control, CCTV surveillance, and asset tracking voice and digital communication which is all centrally managed from any location. This provides a much safer and secure learning environment.

Wireless

Enable secure and reliable indoor and outdoor network access to extend the reach of the classroom and improve space utilisation on campus.

..Keeping IT Simple - Multipurpose learning spaces and access to resources from anywhere on campus.

Unified communications

In today's learning environment the ability to deliver the right information at the right time is essential. A unified communication solutions provided by Angel enhances communications, collaboration, security, productivity and operational efficiency.

..Keeping IT Simple - Voicemail and email integrating, one device and medium for all personal communications whether it be voice, data or instant messenger.

Angel & Education

Digital Media System

Academic institutions of today face the task of improving campus communications, accommodating different learning styles, and enrolling more students without adding Classrooms. Angel is one of the first resellers globally who can deploy the Digital Media System (DMS) solution to meet these challenges.

DMS lets you deliver effective communications instantly and in a way that engages students with a variety of educational materials, and also provides distance learning. Angel can deliver live and on-demand video content to PC's and digital signs.

..Keeping IT Simple – Mass communication of critical information such as emergency announcements or anytime pre recorded teaching to improve student's information retention and learning.

Virtualisation

Angel can help your academic institution remain on technologies leading edge with a powerful virtualisation solution to create a greener data centre, improve disaster recovery and simplify systems administration.

..Keeping IT Simple - Deploy multiple virtual machines on fewer physical servers to reduce power consumption and dynamically move virtual machines and servers as required enhancing disaster recovery.

References.

Angel have a proven track record for delivering exceptional service.

Weston College (Weston Supermare)

Angel has worked with the College for many years and in that time we have:

- Supplied and Deployed approximately £1 million worth of Cisco products
- Installed a fully converged Cisco network (approximately 2500 ports) to deliver data, video and voice.
- Integrated new site with legacy equipment.
- Provided hardware support and a fully outsourced technical helpdesk service for all networking issues (telephone, remote access and onsite cover).

“.. Their ability to deliver an end to end solution with a leading manufacturer in Cisco, backed with a proven record as a Gold Partner, gave us a single supplier that gave the best results in terms of functionality and integration.” **ICT Manager at Weston College.**

Oxford University

- Supplied and Deployed in excess £1 million worth of ICT products into a number of Departments and Colleges.
- Implemented a secure remote access solution to enable University staff to access resources anywhere, anytime.
- Provided hardware support and a fully outsourced technical helpdesk service for all networking issues (telephone, remote access and onsite cover).

“.. exceptional. I have tested the company’s services exceptionally hard and feel that they have proved themselves as reliable as the Cisco products they install. Probably the best company I’ve had the good fortune to deal with.” **IT Manager St Peters College Oxford**

Corby Academy

- Supplied and deployed a converged network infrastructure in a state of the art new campus build.
- Implemented a comprehensive campus video communication system.
- Provided ongoing maintenance and support.

“.. I have been impressed with their willingness to go the extra mile throughout the project lifecycle and beyond. At all times I felt that they had the same enthusiasm for the end result as myself and the desire to see it through.” **IT Director Corby**
